Download Passion Of The Christ MOVIE.eduardo costa discografia completa torrent Q: jQuery's \$.ajax function does not send JSON to PHP script I have a simple PHP script that is supposed to receive JSON object from client: \$json = file\_get\_contents("php://input"); echo json\_encode(\$json); I try to test it by using jQuery's \$.ajax function: \$.ajax({ type: "POST", url: "test.php", data: "json=" + JSON.stringify({"id":"1", "data1":"0"}), dataType: "json" }); But I get empty string back from the PHP script. If I change dataType to "text" then I see that my data are not escaped as JSON objects. I use JSON.stringify to escape my data for the PHP script. Why it does not work as expected? What is wrong with the PHP script? A: Try: \$json = file\_get\_contents("php://input"); \$post = json\_decode(\$json); echo \$post->data1; If you look at the headers: HTTP/1.1 200 OK Cache-Control: no-cache, private, no-store, must-revalidate Content-Type: application/json; charset=utf-8 Pragma: no-cache Expires: Thu, 01 Jan 1970 00:00:00 GMT Date: Mon, 20 Aug 2012 10:35:17 GMT Server: Apache Content-Length: 10 You'll notice that there's no Content-Type header, which means 2d92ce491b
